

CSS Selectors Cheatsheet

h1

Tagname

Use the tagname of any html element as selector.

```
<div class="card">
  
  <h1>Title</h1>
  <a href="/buy">
</div>
```

.card

Class

To select an element based on it's class, use . or dot followed by the *class* name.

```
<div class="card">
  
  <h1>Title</h1>
  <a href="/buy">
</div>
```

#product

Id

To select an element based on it's id, use # or hash followed by the *id* value.

```
<div id="product">
  
  <h1>Title</h1>
  <a href="/buy">
</div>
```

img[alt]

Attribute

To select an element with a certain attribute, use box-brackets and the attribute name.

```
<div class="card">
  
  <h1>Images</h1>
  
</div>
```

img[alt="ship"]

Attribute Value

To select an element with a certain attribute and value, use box-brackets and the attribute equals the value.

```
<div>
  
  <h1>Images</h1>
  
</div>
```
