CSS Selectors Cheatsheet

h1

Tagname

Use the tagname of any html element as selector.

```
<div class="card">
        <img
        src="bottle.png">
        <h1>Title</h1>
        <a href="/buy">
        </div>
```

.card

Class

To select an element based on it's class, use . or dot followed by the *class* name.

```
<div class="card">
     <img
     src="apple.png"
     alt="apple">
     <h1>Title</h1>
     <a href="/buy">
</div>
```

#product

Id

To select an element based on it's id, use # or hash followed by the id value.

img[alt]

Attribute

To select an element with a certain attribute, use box-brackets and the attribute name.

img[alt="ship"]

Attribute Value

To select an element with a certain attribute and value, use box-brackets and the attribute equals the value.
